PROCEEDINGS 1 FRANK HEIDLBERGER, 2 having been first duly sworn, testified as follows: 3 **EXAMINATION** 4 BY MR. ALLEN: 5 Mr. Heidlberger, my name is Michael Allen. 6 7 counsel to Timothy Jackson. Have you ever been deposed before, sir? No. 9 Α. So, I'm just going to go over a few ground 10 This is a relatively formal conversation. A 11 rules. 12 deposition, although it's taking place in a private office here, is actually an extension of the Court. The 13 purpose of depositions is both to find out what you 14 know, obviously, and also to find out what you would say 15 at trial. 16 17 I'll start with a few preliminary 18 questions. Is there anything that would prevent you 19 from giving truthful testimony today? No. 20 Α. Are you taking any medication that might affect 21 0. your memory or ability to testify truthfully? 22 No. 23 Α. Are you ill in any way? 24 Q. I have Type 1 diabetes, that might affect over 25 Α.

```
time my condition, but I will indicate that if I have a low blood sugar situation.
```

- Q. I'm glad you raised that, because if at any time you need a break or you need more time to examine a document, please say so. Likewise, if something I ask you is unclear, I can assure you that it's no reflection on you that you would ask for clarification, it's a reflection on me.
- It's perfectly legitimate for you to interrupt me at any time and ask me for clarification. I don't want you to answer a question that you didn't understand or answer a question that is actually different from the one I was trying to ask.
 - A. True. Sure.

- $_{\mathbb{Q}}.$ But that said, if you do not ask for a clarification, I will assume that you understand the question.
 - A. (Witness nods head affirmatively.)
- If you could, also, when you answer, please answer audibly. As you know, this is being transcribed by the Court Reporter, but the record is going to be a

```
print record, which doesn't capture things like nods of
1
   the head or "uh-huhs" or "huh-uhs", so if you could
2
   please audibly answer "yes" or "no" and enunciate your
3
   answers in that way.
4
                  Like I said, it's a formal conversation, so
5
   some things that happen in day-to-day conversations,
6
7
   which are perfectly normal, are not suitable for a
   deposition.
              Is that public record?
9
        Α.
              The deposition records will be a public record,
10
        Q.
11
   yes.
12
              Okay.
        Α.
              There are provisions for designating parts of
13
        Q.
   the record, if it's necessary, confidential, and you can
14
   discuss that with your attorney.
15
              Uh-huh.
16
        Α.
              I understand as a party in this case, you're
17
        Q.
18
   represented by Mr. Bohuslav, correct?
19
        Α.
              Correct.
20
              Thank you.
        Q.
21
                   MR. ALLEN:
                               Matt, in the past depositions,
   we have stipulated that all objections, except for those
22
   as to form, will be reserved till the time of trial.
                                                            Is
23
   that our understanding today?
24
                   MR. BOHUSLAV: Yes.
25
```

- $_{\mathbb{Q}}.$ (By Mr. Allen) Let's start with a preliminary exhibit, Mr. Heidlberger. Incidentally, do you have a preference? Shall I call you Mr. Heidlberger, Professor Heidlberger?

 A. No, it's totally your choice is fine. That's
- A. No, it's totally your choice is fine. That's totally fine.

- A. All right.
 - Q. May I ask you if you recognize this document?

literature in the 1980s. Finishing that up with an equivalent to the Ph.D. in 1993, I think, or '91. It's about 30 years, now. After getting a non-tenured professorship right after that, which was a very lucky situation, and writing my second dissertation, that is a special thing in the German academic world called Habilitation, completing that in 1998 in the field of historical musicology. I then was on the market, and I can further elaborate that once we get to it, because to a certain amount, Tim Jackson is involved in that development, which was very positive for me. Being hired after

having actually -- yeah, in between being on the market, I had a very high level national scholarship from

Germany, the Heisenberg scholarship, that allowed me to intensely travel and do research at various places, such

as Vienna, Austria, and Washington, D.C. 17

And in the course of that, I got very much involved with colleagues, also from this country, and I was at some point then invited -- in 2000 invited to the University of North Texas, and that ultimately led to my hire as the associate professor with short tenure track. In 2001, professor of music theory, that transition is worth to mention, I -- you know, I have this background of historic musicology as taught in Germany with a

German tradition, but hired here as a music theory
professor.
            The reason that I add historical components
to music theory.
              So, mostly what I'm teaching and
researching in is the field of history of music theory,
which is a subdiscipline of music theory in some very
few selected colleges of music in the U.S., and UNT is
one of them.
              And from there, I made my career at UNT,
becoming full professor in 2006, becoming department
chair in 2012. After having served as coordinator of
music theory, that tenure as department chair ended, in
2018, and then I was reappointed as head of the -- or
coordinator of theory in 2019, up to now.
              So, that's what I still do. So, in effect,
I'm teaching one class per semester, that's usually my
doctoral seminar or seminar styled class and doing
administrative work related to operational and
strategical planning of the music theory area, in close
connection to musicology and ethnomusicology, which are
also part of our division.
              So far, I'm very -- very -- well, I have
very much experience and close knowledge to everything
regarding our theory program and our academic program at
UNT.

- Funny enough, I did everything at one Α. university, and that is University of Wurzburg.
- And there, you completed both your diploma -your dissertation and Habilitation?
- Yeah, all three, master's, Doctor Phil, and Α. Habilitation.
- I'm assuming you applied for and received the Heisenberg Fellowship. What year did you do that?
- 1998, and I got it for 1999, for six years, Α. unless I get hired somewhere, then it automatically ends.
 - Is that funded by the German government? Q.
- It is funded by the German Research Council, Α. Deutsche Forschungsgemeinschaft.
- Okay. And you said in 2000, you were invited 0. to UNT. Could you explain what you mean by that?
- I was at the national library in Vienna and ran Α. into Dr. Jackson, and we knew each other from other conferences, it's a little field internationally, and so we had small talk, and I said, hey, in three months, I'm going to Washington, D.C. for a while, so I'm in the country.

And he initiated to invite me to visit UNT for a guest lecture, and that was -- I stayed for a couple days and returned home, and, ultimately, back to Germany. And then Dr. Jackson actually called me and said, there's a position open, would you apply? And my answer was, no, I'm not a music theorist, I won't apply. But, of course, I had a second thought because I was as well in that stage of academic desperate to have a full-time position, so of course I applied. And I was actually required to apply because the Heisenberg, that's one stipulation, you have to apply to positions, if they're opening up, and you have to accept them, if you get the offer. So, really, that's the background. then, I got a call and got into the normal steps of an application process, so a phone -- back then, it was a phone interview, today's it's Skype. Very funny because it's late at night.

- Q. The Skype utopia had not yet arrived.
- $\hbox{A.} \quad \hbox{Exactly.} \quad \hbox{So phone interview, then I was} \\ \hbox{re-invited, so I flew to Texas in April.}$
 - Q. And this invitation was, again, for a talk?

doctoral class, and the quest lecture was actually

- It was 2001 you were hired. I am sorry. Q.
- Yes, 2001, that's 20 years, now. That's crazy. 4 Α. The answer is yes. 5
 - At the time you were hired to the University of North Texas, considering your specialty, was that considered a very good job in your field?
 - Α. Absolutely.
 - And were you very happy to take the job at the University of North Texas?
 - I gave up my roots in Germany to get this position, so I did put a lot of effort into this, and it was worth every minute. And I knew it academically that was the right decision for me.
 - I did apply, in the course of the next five, six years to other positions in Germany, but, yeah, that never worked out, so I -- I never regretted one minute that I applied and accepted the offer.
 - Q. And how would you compare the university system, in general, in Germany to the university system, in general, in the United States?
 - This would be a very big topic, but I try to narrow it down to some major points and from my personal Things change a lot and, you know, might perspective.

be different now than they were 20 years ago.

So, when I came, the mentality was in Germany, especially for music fields and especially for academic music fields, restrictive, cutting down positions, frustrated colleagues. And when I came here, it was kind of feeling really everything is possible, you can design that what you want to do to your position, very flexible, very open ears in the higher administration for your ideas.

Whereas everything in Germany or in Europe, mostly, say actually worse in other European countries, but also in Germany in that way, it was an outdated field. We all put our efforts into technology and simply there was not much support organization for the fields of theory and musicology.

They were considered niche fields that are just irrelevant. And that might, at times, be the case here, too, when it gets to big funding, but it is -- it is much stronger and much -- it's just much bigger and, you know, the field's still a small field, but it is much bigger than in Germany.

An institute -- comparable institute at a large university in Germany has maybe two or three professors. We have just for that -- for the academic fields in our division 21 professors. That is unseen in

```
the world.
               It's also one of the biggest in the U.S., if
1
   not the biggest.
2
                 The other big difference is that there is a
3
   clear distinction between the institution of university
4
   and the institution of Musik Hochschule or conservatory.
5
   Music is considered a field that belongs to the
6
7
   conservatory, and most people, non-musicians but, you
   know, colleagues from other fields consider that, well,
8
   you practice and you play for your professor an
   instrument, that's what you do at a conservatory.
                                                       So.
10
   it is kind of fairly restricted to performance, and that
11
12
   is a big difference to the U.S.
             Is the Musik Hochschule similar to, say, the
13
        Ο.
   Berklee School of Music or --
14
             Yes.
15
        Α.
             -- in the United States? As part of the
16
   deposition, if you could just let me finish my question.
17
18
   I don't want to interrupt you either. So, if you could
19
   just do that, then I think it will create a clear record
   for the Court.
20
21
                 So, let me just phrase that again because
   we got involved in speaking over each other. So, I was
22
   asking, is Musik Hochschule in Germany similar to, say,
23
   the Berklee School of Music or Juilliard in the United
24
```

States?

A. Yes.

- Q. Thanks. And can you describe, maybe in the same brief, general overview, based on your personal experience, the evolution of the University of North Texas since you've come there in 2001?
- A. The striking impression that I have from the beginning was the diversity of fields and specialties that are taught there. Also, it was clearly defined back then as a school that has a very strong focus on Schenkerian theory, which was also in the early days strengthened by certain hires, which Tim Jackson and myself were, you know, very much involved in strengthening that field.

It was also, back then, that Tim Jackson had built the Center for Schenkerian Studies, securing major collections, in one case, a collection that was a very reputable German university who did not care for this, and Dr. Jackson was able to secure that collection for our library and for the research in Schenkerian studies, which was a big deal.

And so, it was perceived, and also the outside reputation was clear that UNT theory has a strong focus on Schenkerian analysis. At the same time, though, since it's such a big school and that is the big advantage of it, we also had specific non-Schenkerian.

So, we always had a very productive discourse in that
regard and other fields covered, among them music
theory, which I took over.
              And along with this, being the editor of a
journal, the Journal of Theoria, Aspects of --
Historical Aspects of Music Theory. That's it's title.
It's a peer review journal that I revised and brought
forward to be published by UNT Press, suggesting that to
Dr. Slottow Dr. Jackson of -- you know, when the JSS was
in its early days to approach UNT Press to publish it
there, and this all worked out very well.
              And that way, so we had two journals coming
out of the division published by UNT Press and
internationally perceived as specialty journals in their
respective fields of Schenkerian studies and history of
music theory.
              Other than that, there was no connection
between the two -- between the two journals, in terms of
the editorial process. So, that was the principal
reputation and also structure of the theory area. And
over time, this remained the same, although with big
changes as to mostly retirements, so we got by now -- I
mean, during the time I was division chair, I hired, I
think, seven new professors, which is unseen.
years I hired seven new professors, with the help of the
```

```
search -- or, you know, with the recommendation by the search committee.
```

- Q. Could I interrupt you for just one second?

 Because I find that interesting. And I agree with you, that's quite extraordinary. Was that because of the replacement of retired or perhaps deceased professors, or was that actually expansion of the university?
- A. Both. Both. I could go more into detail, but it is a mix of both. It was mostly initiated by a retirement situation. And then a follow-up question, if we had, for example, two extremely qualified candidates for one position, I dared to ask the dean here, we need to hire both. And that sometimes indeed worked, which is quite unseen.
- So, we got -- this way, we got young, excellent and, in terms of topics, very diverse new faculty. The idea back then, as part of the College of Music strategic plan was to diversify the fields of music theory and musicology with regard to non-western analysis and popular music studies, which has become a very strong subfield in music theory.
- And so hires were focused on these fields, but not only, we also replaced previous faculty, in terms of common practice, repertoires and western classical music that still needs to be covered because

we have this large performance component that we have to
serve, so to say.
```

- So, it's a mix of both, but there was a clear tendency going into fields that were underrepresented or just emerged from the general discourse of music theory.
- And could you explain Timothy Jackson's Ο. participation in or contribution to diversifying the fields with regard to non-western or popular music in the -- I think you're called the MHTE division --
 - Yeah. MHTE division. Α.
 - -- of UNT? Q.
- As chair and supervisor of Dr. Jackson Yes. Α. and, you know, having him involved in the search committees back then, I was always very keen to get his opinion about things, because he, with the weight of his seniority and being a distinguished research professor, it was fortunate to have him on board.

I can only say that was not always easy. We often had very different perspectives on things, but I think that was within the -- totally within the perimeters of productive professional discourse. You know, so that was not a problem, it was just a challenge and a good challenge because it would make me think more about how can I better formulate to convince people, you

```
know, that we need that kind of professor, rather than another kind of professor? So -- and so far, yeah, challenging but productive.
```

- Q. Can you explain a little bit more about what a distinguished university professor is at the University of North Texas?
- A. That is a special category of -- an honorary category, so it doesn't change the position, as such, or the level, it is -- the principal requirement is that the person is a full professor, and he goes through -- he or she goes through a very wide and strict vetting process, including outside evaluations, like we do it when we have a promotion or tenure case.

So, the person is being vetted, in terms of his or her national and international reputation with regard to the field as a scholar. And this was established -- it then comes with the title, and I think a little bit more of salary and stuff like that.

But, unfortunately, it doesn't really provide the amount of, say, research funding that one would wish that comes with this position. But still,

it's -- it's very important and very strong, and also
handled very restrictively, that is important, so it's
not just, oh, well, you apply and eventually you'll get
it.
     That's not how it works.
              It's really a strict vetting process of
maybe -- there is actually a percentage in the
background who can -- how many can get this per year.
And with a University of that size, it's maybe two or
three per year, maximum.
              And the special situation year was that it
was established in 2009 or '10, and Dr. Jackson and
another colleague from MHTE, a musicologist, Dr.
Friedson were the first at UNT who received that
distinction.

22

- That's perfect. Thank you. Α.
- So, let me start with Theoria. How much Ο. funding is provided for that journal's operation, publication, editorial staff, production, anything of that nature?
- I have a contract with the -- with UNT Press, which pays me \$100 or \$200, something around that level per issue, and there is one issue per year because it's very small. But they do pay a couple hundred dollars. I was forcing them doing that because, first of all, yeah, it's just -- it barely covers the running costs that I have with it, which is not much. In the past, we printed it ourselves and put it to binding, university binding and stuff, and then, you know, collected the So, we were kind of income directly to the division. doing the marketing and all that, you know, and the production.

So, since it's at UNT Press, they actually didn't want to pay anything, but I said I need \$200 per In the past, it was better because I could actually finance trips to national conferences and represent Theoria that way. That is not possible with

that small budget.

- Q. Does the Theoria Journal actually generate income?
 - A. I don't think so.
- Q. Do you know what your subscriptions list is, in terms of numbers of descriptions?
- A. Only as of maybe ten years ago, because after that, it went to the university or to the Press, and I don't have input in this. Maybe 50, 60 institutions, mostly libraries, big university libraries.
- Q. Can you say how many downloads there are of articles in any given month, track other metrics that way that you might explain how widely spread the journal is?
- A. We have the same system as JSS, so after one year, the -- an issue is opened up at the -- it's called UNT digital library. So, you have full text access to the paper. And so, once a year, when an issue comes out, through our SMT, Society of Music Theory, national level, I publish on their e-mail list the issue of the new volume, and also add all previous volumes can be seen.
- That always causes, of course, a surge of clicks. So, at about -- I would say it's at that time about 700. And in the down time during the year, it's

```
between 200 and 300 total. So, you can say a thousand clicks.
```

- Q. And, of course, I'm asking for ball park numbers. I understand -- my guess is some volumes are more popular or less popular than others, is that correct?
 - A. That is correct.

- Q. And in your experience, is it similar to the circulation enjoyed by the Journal of Schenkerian Studies?
- 11 A. I cannot specifically answer that question, but 12 I think so.
 - Q. And, incidentally, if you can't answer a question because you don't know, that's a perfectly legitimate answer. Thank you.
 - A. Okay.
 - Q. You had also brought up the Center for Schenkerian Studies. As either an administrator or just simply as a faculty member of the MHTE division, do you know how much of a budget the Center for Schenkerian Studies operates under?
 - ${\tt A.}$ To my knowledge, and that is of 2018, when I was administrator, it was close to nothing.
 - Q. Let me ask you -- go ahead.
- 25 A. Unless it was -- it was funded from outside

sources, from private sources and things like that. But I'm not aware of a university -- of -- of a designated university budget for the center.

- Q. And I think you already said that it was able to secure major collections and, in your words, was -- some of these collections and activities of the center were a big deal. Am I summarizing that correctly?
- A. That is correct. And, yeah, thanks to the efforts of Dr. Jackson, it went beyond the small, scholarly circles. So, he published or he initiated or was involved in CD productions and wrote the liner notes.

He made very highly recognized recitals and concerts of the lost composers programs or programs of composers who died in the concentration camps and things like that. So, it was, you know, both a very important by topic undertaking, and second, the way it was done was very much going beyond just the small silos of the field. It went into the public. So, that was very strong. And I always had the feeling that this is not sufficiently recognized by the higher administration, in terms of funding.

Q. Is it safe to say, then, that with almost no resources provided by University of North Texas, the center has distinguished itself in the recognition and

```
scholarly achievements that it's been able to produce
1
   over the years?

                                  Objection, leading.
                   MR. BOHUSLAV:

- There are regular, recurring evaluations of all the scholarly centers at the university, and among that, the Schenkerian Studies Center, in order to be existent, but I am not aware that this comes with a specific funding quarantee.
- And as a former department chair, and as I Ο. believe you described yourself as the head coordinator of theory from 2019 to the present, would you be in a position to know if those kinds of requirements had been imposed upon the center in the past?

That might not be -- that the centers are actually administered from the provost level and the dean directly and, interestingly, the department chair, the coordinator are not explicitly involved in the planning of those centers, which is strange, but that's how it is.

So, could I have that question read back to the 5 witness, please? 6 7 (THE RECORD WAS READ BACK.) May I ask for clarification of the guestion? 8 Α. Is the question whether I see elements of the work of the center as racist, or did I recognize others 10 identifying the work of the center as racist? 11 12 (By Mr. Allen) I'm glad you asked for that Q. clarification. Let's take them in turn. Were you ever 13 aware that anyone else condemned the work of the center 14 as racist in content before, say, July 2020? 15 There are two components to my answer. 16 Α. no, not explicitly racist. But the nature of the work 17 18 of the center and of the work, specifically, of Dr. 19

Jackson sometimes causes composers, including well-known composers, to be identified as very close to national socialistic influences.

And here, yes, again, not my opinion, but the opinion as it was perceived was Dr. Jackson's research on John Sibelius, for which he did -- for whom he did very detailed source studies, finding out that

more than close connections with the national socialist party. And you're aware of this?

- A. Uh-huh. I'm aware of the discourse and --
- Q. And there were some scholars and philosophers who were incensed that anyone would dare identify someone they found beloved as a Nazi, regardless of the evidence sometimes. Was this a similar controversy in music history and music theory with Sibelius?
- A. Not to this extent, since one side was pretty much only represented by one person, and that was this -- that was Dr. Jackson stating that influence. But in terms of the effect, it is somewhat comparable, maybe not to this extent.

I would actually more compare it with another big discourse of the 1980s that was related to the Richard Volkner, and here to clearly differentiate. So, we recognize, according to the source documents, that Richard Volkner clearly was anti-Semitic to a militant and really destructive level, that is obviously in his writings.

And now, two things. Can we then listen to his music, and another step would be, are those who love Volkner's music then necessarily anti-Semitists? Is that the right word? But the person who, you know, support anti-Semitic thoughts. I mean, it is that three

step kind of that is relevant here in this discourse.

I think with the John Sibelius case, that didn't go that far, but it was on the same level. He's a beloved composer, how dare to say this kind of thing?

- Q. As a follow-up question, I think I understand the contours of the controversy, which we don't need to get into, for the purposes of the Court, but was Timothy Jackson himself accused of being racist for drawing these connections, presenting this evidence, presenting this interpretation, historically, of the composer Sibelius?
- A. I'm not aware that the word "racist" was used -- would have been used in that context because it would not match the evidence. We're talking here about a totalitarian German state between 1933 and 1945, with outrageous consequences, as we all know. So, that has nothing -- it's actually the opposite. It was the race that was the problem or the misinterpretation that -- the harsh misinterpretation of racial supremacy that was the cause. So, it would be the opposite, and so for the word racist -- which by the way has only become fashionable and popular in more recent times with regard to music discourse was not used, to my knowledge, in this context of Sibelius.
 - Q. And just -- I want to hopefully conclude this

- I don't know. Of course, it is related with Α. the larger context of what the center represents, but it could also have been done by an individual scholar, and I interpret that as individual scholarly Dr. Jackson. It, to my knowledge, did not require, necessarily, the resources that the center presents.
 - (MS. HARRIS LEAVES ROOM.)
- (By Mr. Allen) To your knowledge, there were Ο. no archival resources that Timothy Jackson drew upon directly from the center to propagate his ideas, scholarship regarding Sibelius with regard to the question we've been discussing?
 - I must correct myself. Yes, there was. Α.
- And what was that? Q.
- The name of that composer was -- with G. The Α. composer who -- may I address Dr. Jackson to ask to help me with this name?
 - No. Q.
- There was a composer who sought help 22 Okay. from Sibelius, a German composer who was threatened by 23 the Nazis, and Sibelius rejected to help that composer. 24 Right now, the name of that composer eluded me, I'm 25

 - A. I can't confirm that.
- Q. And regardless of the name of the composer, those were archival resources that were located at the center, is that it?
- A. Again, I am sorry to be unspecific here, but I think so. It could have been related to material that the center has gathered, but I'm not entirely sure.
 - Q. Is it by any chance the name Gunther Raphael?
- 12 A. Yes. Raphael, yes.
- 13 Q. Could you pronounce that and spell it for the 14 Court?
 - A. Okay. Gunther Raphael. So, that is G-U-N-T -- maybe T-H-E-R, Gunther, and then R-A-P-H-A-E-L.
 - Q. And I guess my last question, I just mean it to be a "yes" or "no" question, if a scholar were to access archival materials of the center and publish something about that, does that make that the center's work, or is that simply the scholar's individual work, in the eyes of the scholarly community in which you're embedded?
 - A. That's not a "yes, no" question.
 - Q. It's good that you point that out. Let me rephrase it. If a scholar accesses the scholarly

archives of the center and then publishes something that
1
   is the scholar's work on that, is that considered the

24
        Q.

25
```

Benjamin Brand, is that correct?

A. Yes.

- Q. What was your purpose in writing this e-mail to Benjamin Brand? And as part of that explanation, could you explain for the Court who Benjamin Brand is?
- A. Benjamin Brand is the current chair of the Division of Music History, Theory and Ethnomusicology, and as such, my successor in that field.
- Q. And what was your purpose in sending him this e-mail?
- A. I sent this e-mail in consequence of emerging concerns by colleagues, partially expressed in e-mails, partially expressed in -- as far as I remember, in -- mostly in Facebook, of which one Facebook post by Ed Klorman came up, who singled out the case as we know it.

Publication of JSS articles with problematic formulations, and the reactions to this post as they were posted as comments in the bottom of the Facebook posts saying things like, well, I hate to say, but I'm a UNT alumnus or, look at these guys, their MHTE mission statement states that they are fair and non-racist, and then they produce something like that.

In other words, the generalization of one particular problematic case as one may interpret that of people involved being interpreted as a general opinion

of the division and the theory area as a whole, which would be a wrong interpretation, and my sense that we have to react against this misinterpretation of the work of my colleagues in the division and in the field.

- Q. You've mentioned a couple terms that I don't understand, a problematic case or one case that we know of. What are you referring to, when you -- speaking in these general terms?
- A. Yes. I refer to the case that some articles in the Journal of Schenkerian Studies that represent the colloquium as a response to Phil Ewell were not well edited, not edited to the standards of peer reviewed, scholarly journals, but represent opinions, partially even anonymous opinions in a way that is not appropriate for a scholarly journal.

And that's not my opinion. That's what I saw in the reactions -- in the public reactions in the field that this was seen as the problem. So the problem of incorrect handling of editorial procedures of a scholarly journal. It's not a newspaper. It's not an opinion paper.

And second, the nature of those problematic statements supporting -- and again, that is the perspective that others implemented into this situation, that the articles do exactly that what Phil Ewell tried

```
to fight, and that is the white framing of music theory
1
   in terms of repertoire, in terms of the interpretation
2
   of repertoire and of methodologies, particularly
   Schenkerian analysis. And that is -- yeah. That's my
4
   point.
5
             So, I want to ask you, you're referring to the
6
7
   symposium published in Volume 12 of the Journal of
   Schenkerian Studies, correct?
             That is correct.
9
        Α.
             And that is distinct from other articles
10

Could you give some examples, just based on

your own personal experience?

- A. It is usually, in a much smaller scale, a direct response to an article published in a previous volume, and you open up the perspective for people who want to respond, usually criticize statements in a given article, that then causes a response by another author.
- So, it is not usually a collection of articles, but a response to previously published articles in the same journal.
- Q. Are you aware of journals that would have published responses to, other than an article published in a previous volume of the journal, as you've just characterized it?
 - A. Sorry. Could you repeat this, please?
- Q. Let me see if I can -- I want to see if I understand what you said. So, it sounds to me like you are aware of symposia published by other journals in which there is a collection of perspectives published in response to an article, but you characterize the article as usually in a previous volume of that very self same journal.
 - A. Yes.
- Q. And let me pause to ask, can you explain or state any specific examples of journals that have done that, that you know of?

Well, the small scale type of response that I
     Α.
refer to, I did this in Theoria about Aspect of
Historical Music Theory, modal theory of the 16th
century. There are two perspectives as to how much
tonal aspects of music theory has influenced the
understanding of modes, which are a medieval way of
explaining the musical scales, can be seen.
              And there are basically two opinions, I
guess, or whether this influence of tonal impact us
        So, I had a discussion like that. So, what I
did is, when I got a response, I said, okay, I will

and told him, okay -- and I informed the -- the
respondent that I will share this answer with the
author, giving him the opportunity to directly respond
to the response.
              And I got the response, both where I

 - They were marked as letters to the editor, and they are usually not peer reviewed, so they were specifically not articles, but letters.

A. Yes.

- So, in the JSS, you refer to the scale of the symposium. Do I get that -- did I understand correctly?
- A. I used the term the scale merely within the context of the 16th century modal theory that I explained. So the musical scale is usually a number of notes within an octave, either a half tone or a whole tone apart from each other that define various modes. So, it is the interpretation of musical scales. I only used that term in that context.
- Q. I'm glad you cleared that up. And you said that the symposium, which was this collection of papers published in Volume 12 of the journal, was seen by colleagues as supporting exactly the kind of approach to music theory that Philip Ewell was trying to fight.
- My understanding is that you're referring to Philip Ewell, a professor of Hunter College, and his plenary address to the Society for Music Theory that took place in the beginning of November 2019. Is that correct, just to clear that up?
- ${\tt A.}$ I think it was in November 2019, if I'm correct. And yes, the answer is yes.
- Q. And is that impermissible to oppose Philip Ewell's scholarship on music theory in the way that it was done in the symposium?

- And what specifically, if there was a wrong way Ο. that was done in the journal, what specifically was the wrong way, and what was the right way that should have been followed?

MR. BOHUSLAV: Objection, compound.

- I was present at Phil Ewell's presentation and was delighted by the rhetorical elegance of his presentation, and at the same --
 - Go ahead, please. Q.
- I was delighted by the rhetorical elegance and 14 his presentations and shocked, at the same time, by his 15 blunt simplification of very complex historical facts. 16 My first private thoughts that I didn't share with 17 18 anyone was, oh, my God, how will Tim Jackson react to this? 19 He has to react.

And so I thought, he has a journal, and he will do the right things to prevent a platform for open discussion of these points.

- Did you just say, "prevent a Can I interject? platform"?
 - "Provide." Α.

"Provide." Thank you. Q.

At the same time, I was very concerned and was thinking, oh, my God, hopefully he does it politically correctly with all the steps involved. These were my private thoughts because I know Tim Jackson in the best sense and respect his work. But I knew that needs very, very careful consideration and constant oversight from the highest level; in other words, from Tim Jackson himself.

Don't get the student involved and the whatever, you know, lecturer who was the previous editor who was involved in this, and discuss it explicitly with That is major. Even asking to the point the board. just, you know, by courtesy to say, you know, okay, we -- I plan something that might be very controversial. Do you agree with me doing this address to the board members?

So, assuming all that, and a very strict selective and peer reviewed process with regard to these responses, because they are not responses, they are on their own right reactive scholarly articles towards the main point of Ewell's statements.

Given that, it would be absolutely productive and healthy and correct to do this kind in this journal, which is dedicated to Schenkerian studies.

```
Unfortunately, in the process of seeing the announcement published, and then seeing, once the volume was published, the introduction to the symposium, I was very disappointed and see that this was not handled correctly.
```

- Q. And you made a distinction between reactive scholarly articles, not responses. Could you be more specific about what the difference is between those two?
- 9 It was my understanding that Dr. Jackson opened up the JSS primarily to write substantial articles about 10 the points that Dr. Ewell raised in his presentation. 11 12 If I remember correctly, in the call for papers, that was kind of left open in a way that it also could 13 include immediate reactions, which then were published 14 actually as, you know, one, two paragraphs of some sort, 15 what kind of nonsense Ewell's thing is, you know, how 16 productive that kind of publication is is another 17 18 question. But it -- just from the status and the 19 character of the journal, I assumed that these will be substantial articles. 20
 - Q. Is there any requirement, that you know of, that a journal like the JSS not publish responses to a paper such as Philip Ewell's?
 - A. Formally, no.
 - Q. You also said that you were at once impressed

by the eloquence of Philip Ewell? I think you put it in something like those terms?

A. Rhetorical elegance, yes.

- Q. But you were also shocked at the -- at least some of the substance of his talk, as well. What was it about his talk that you found shocking?
- A. Some of his statements, particularly regarding specific historical documents related to Schenker, such as correspondence or draft statements that did not get published, versus publications, these things were bluntly simplified in the treatment by Ewell, who is a music theorist.

My background is music history. I'm very much related to textural criticism and editorial procedures of historical documents. And I just got the sense he just treats them wrong, he just bends them in a way that fits into his argument, and I was not comfortable with that.

Plus, the main point, which is right, and I think nobody would deny that, that Schenker made racist and nationalist statements in various contexts, mostly private contexts, interestingly, but also raging against the French. These publications of the early 1920s are full of it. And if you look at the context he lived in and the political situation of Austria, Hungary and

```
Germany at that time, it's something that doesn't
1
   surprise at all.
2
                 So, all that is known and was discussed to
3
   death by previous generations of Schenkerian and non-
4
   Schenkerian authors, and he kind of presented it as if
5
   something coming out of a volcano as totally new
6
7
   knowledge, and you know, it's very much not right.
                 So, I'm very blunt, you know, I'm a very
8
   critical thinker, and these were the critical points
   that I had to Ewell's statement, you know. Still, his
10
   general -- and this was only maybe eight -- I actually
11
12
   looked it up in the video, it was about eight minutes of
   his 20-minute discussion that he addressed Schenker.
13
                 That the general narrative of his
14
   presentation and the way he treated the topic of white
15
   framing had some issues that the field urgently needs to
16
   address and needs to further discuss, definitely.
17
18
        Ο.
             Did you ever express any of your criticisms of
19
   Philip Ewell on any public forum?

          I agreed to the extent that some sections of
specific articles could be interpreted as racist, yes.
          And could you identify, if you can remember,
the explicitly racist statements in some of the
articles? And here I'm quoting from your statement
here, if you look down page -- the page marked UNT 503,
in the middle of that paragraph, it says, "main points
of criticism are the short response time for the call
for papers, the inconsistent solicitation of responses,
and the explicitly racist statements in some of the
articles." So, I'm asking, what would you identify as
the explicitly racist statements in some of the

- I can name examples of racist statements, but Α. I'm not saying in this -- in this text that there are racist statements in there. I'm saying that these are main points of criticism in the social media statements. So, I'm not explicitly agreeing with them. I see that this -- these points of criticism come up; among them, the criticism of racist statements.
- (By Mr. Allen) And you did agree, however, Q. that some of the articles had made racist statements. Ι believe you testified about that earlier, correct?
- The term "racist" is an inappropriate reduction of the problem here, and some statements were simply superficial. And from the perspective of implicit white supremacy, but not necessarily racist as against a certain person with a certain background, and that is maybe implicit of the author, the black music theorist Ewell.

But more obvious, it is the appropriateness or inappropriateness of statements at stake here. that was handled within a very wide range and often inappropriate range in some of the articles, with one exception, and that is, unfortunately, Dr. Jackson's article.

When I read it -- sorry. I want to shorten the answer down here. The third third of the article,

```
roughly, it's a long article, and he put a lot of work
1
   into that. The third third of the article moves from
2
   the genre of a scholarly, well-researched article to an

4
   using words like "the blacks", and I'm quoting here,

   Ewell has something to do with it, because why would it

                 And that I thought was not well thought

- \circ . Can I ask, what was the intended effect of sending these statements to Dr. Benjamin Brand?
- A. Dr. Brand often refers to me as an advisor, as a senior advisor with difficult decisions to make, and here I took the initiative to send him some ideas that might come up in an upcoming discourse. It was just meant privately and confidentially, as it is shown in that sense, never that it is published.
- I wrote this down in five minutes. I had other things to do, but I saw the Facebook thing that -- the avalanche of trouble coming towards us. And I said, hey, do something. This is just a summary, take it or dump it, and, you know, that's all.
- Q. In your experience at UNT, has there ever been a time before where the department was forced or decided -- strike that, please.
- Was there ever a time before at UNT, in your experience, where the department decided to take action, purely based on social media reactions to what a scholar had written?
- MR. BOHUSLAV: Objection, assumes facts not in evidence.
 - A. I'm not aware of any.

And this is information we exchanged. This was all. It was not at all discussed what the consequences will be and such because that in due course is a matter of the higher administration and of the dean.

- Q. And was the information you discussed summarized in your statement that we have examined as Exhibits 25 and 26?

- Q. But as you just stated, there was no potential action discussed in that Zoom meeting?
 - A. Correct.
- ${\tt Q}.$ What did you mean by reputational impact on the MHTE and UNT music theory division?
- A. Music theory is a comparatively small field, particularly in the level we are playing in this field. There are probably two handfuls of institutions that provide Ph.Ds in music theory, which means they are forming the future generation of professors, and we are competing on that level with schools that are, by nature, of a higher status.
- I'm talking about flagship schools, like University of Michigan, Florida State University, and then even into the elite schools, like Yale and University of Chicago. And we compete directly with

these schools for students and applicants, and it is a small field, everybody knows everybody.

And if something goes off track, it immediately damages the field, and not just the field of music theory, but within the institution. And with the situation -- the vulnerable situation we are in as UNT, representing music so much on a national level. that is something I got very aware of as administrator and was very much eager to protect us, just for the sake of success of our students, our current students, our future students, and our junior faculty.

Because by that time we had -- of our eleven full-time music theorists, we have five tenure track people who were scared to death by any kind of this problematic interpretation of what is going on in Denton, Texas.

- By "problematic interpretation of what is going Ο. on in Denton, Texas," do you mean the accusations of racism being leveled against Timothy Jackson, individually?

A. Yes.

- Q. Can you explain how the journal came to publish these articles?
- A. Sure. The page break is a bit unfortunate, so it starts actually where it says on first page "now available" on the bottom, and referring to Volume 26 of Theoria, published in 2020.
 - Q. Uh-huh.
- A. Of which we have in this volume two fully peer reviewed scholarly articles, two reviews at the end which are not peer reviewed, but edited by myself in contact with the authors, and the Russian Music Theory Panel. What that is is that at UNT -- sorry -- at SMT, the site of music theory annual meetings, usually November, there are various topics presented in panels.
- So, they are organized, they are peer reviewed on their own for being accepted for the conference. And when a topic comes up that is relevant to the history of music theory, I visit those panels and occasionally invite the authors to publish it.
- That happened with this Russian Music
 Theory Panel, which is a historical approach to Russian
 music theory. That's why I was interested in it.

- 10 A. Yes.
- 11 Q. And you also published Christopher Segall. Am 12 I pronouncing his name correctly?
- 13 A. Segall, I think.
- 14 Q. And are you aware that Christopher Segall also contributed to Volume 12 of the Journal of Schenkerian Studies?
- 17 A. Yes.
- 18 Q. Is it true that the Journal Theoria did not 19 peer review these articles?
- 20 A. Correct.
- 21 Q. Theoria simply relied upon SMT's conference 22 review proceedings, is that correct?
 - A. Correct.
- 24 Q. In your experience as an academic, is the same 25 level of scrutiny applied to the acceptance of

conference papers as is applied to the acceptance of a peer reviewed journal?

- A. On the national level of societies, yes, absolutely.
- Q. And so, it would be your position that the Society for Music Theory applies the same rigor in accepting papers to its conference as a peer reviewed journal would exert over an author in accepting the papers to the journal.
- A. Yes. But with one differentiation. They are clearly marked as a panel, which means these are statements that can be seen scholarly preliminary to a full-fledged article. And so far, I like to have that published, and excuse me my lengthy explanation, but that's important to make that differentiation, to have them published as what they are and clearly marked as such.

They are contributions to a panel discussion. They are not full-fledged articles. That's why I asked Dr. Bakulina not to write an introduction that clearly outlines that these are contributions within the perimeters of our national conference and not within the perimeters of articles submitted to Theoria going through their regular peer review process.

Q. Is it your experience as either a presenter at

academic conferences or as an editor that a conference, a national conference, even a national conference of the quality that you've represented SMT maintained, that they, for instance, send submissions back for revision before they were to accept them on a second round?

No. Α.

 - Yes. Α.
- So it's not true that the procedures for -even for a national conference for peer reviewing the submissions of conference papers are the same as the peer review for a scholarly journal such as Theoria, is it?
 - In some ways they are harder, yes. Α.
 - They are harder for what? Q.
- For yes or no. You have no chance to correct Α. anything, whereas article submissions have this category of revise and resubmit, which gives you a chance to improve on certain points based on evaluative statement. And with conference contributions, either they got 22 accepted or not.
 - And are conference presentations usually accepted or rejected on the basis of an abstract?
 - They are, in case of SMT, accepted based on a Α.

 - Did you say 750 words? Ο.
 - Something like that. Α.
- For people who aren't published authors, such 0. as the Court maybe, could you state approximately how many pages that is?
- It is two to three pages, and five to six pages 10 with bibliography, references, keywords and examples. 11
- 12 And within general terms, how long are papers Q. submitted to Theoria, on average?
 - 15 to 25 pages. Α.
 - So, much longer than the proposals. Q.
 - Yes. And also, these panel contributions are shorter than regular articles. And, again, it is marked and defined very clearly in the introduction.
 - And Ellen Bakulina in this case wrote that Q. introduction.
 - Yes. Α.
- Was there any objection at UNT, either at the 22 Press or by Dean Cowley or any other administrative 23 official to handling the publication of this panel on 24 Russian music theory from SMT 2018? 25

A. No.

- A. No. And it is common practice for Theoria. I've done that before very successfully, supporting young colleagues getting published, but always with the caveat of clearly marked intention of publishing these panels.
- Q. Understood. I think this is an especially appropriate question for you, given your background as German scholar. Can you as briefly as possible, perhaps two or three sentences, explain what a Festschrift is to the Court?
- A. A Festschrift is a publication to the honor of a specific person, usually a scholar of very high reputation, and usually relates to an anniversary, birthday. Usually, it starts at age 60 up to memorial honorary publications.
- Q. Is it accurate to give a loose -- I know that's a contradicting term. Is it a loose translation of Festschrift to say it's a closing publication?
 - A. Funny enough, not necessarily.
- Q. How would you -- how would you translate it into English? It is, I understand, one of these impossible German words for Americans.

- A. Along the lines I said before, it's a book in honor of the achievements of a particular scholar related to a specific event in the scholar's life.
- Q. Were you aware that in 2017 and 2018, the Journal for Schenkerian Studies published a Festschrift?
 - A. Yes.

Were you aware that those articles also were not peer reviewed?

- A. I was not, but I was not concerned about it.
- Q. Were you aware that those articles were solicited?
- A. Again, since I'm totally out of JSS, I really didn't care, but that would be the normal way. That's how you write Festschrift, you ask specific colleagues, students of that person to honor, to write articles.
- Q. Is it a fair characterization of the purpose of Festschrift articles that they represent the unmediated expression of that author's appreciation for or a statement of how their mentor or the person being honored has influenced their scholarship?
- A. Yes. But that might be very much in the background. So, the topic could be completely unrelated to something that the honorary person has done and such.

Festschrift article, however, correct?

```
It doesn't have to be. It's really, you know, open.

- A. Absolutely.
- Q. Do you remember any objections at UNT to the way the Festschrift, in 2017 and 2018, was handled by the Journal of Schenkerian Studies?
 - A. No.

- Q. I think you, yourself, said you not only had no objection to those volumes, but you would have none, is that correct?
- MR. BOHUSLAV: Objection, misstates testimony.
- A. Assuming that it is a Festschrift, and I must admit, since I'm not so much specialized in Schenkerian studies, I didn't really recognize it how it was actually represented within the journal. Still, it is a journal.
- So, I assume that there was an extensive introduction that explained the specific Festschrift situation or reassignment of the journal volume as a Festschrift. Assuming that, it's fine, it's understood it's Festschrift. But again, I don't know. I really don't know.

 - Q. Do you know if he had difficulty with Yiyi Gao?
- A. Not specifically, but he was the person to submit that kind of situation to me.

- A. Not necessarily. Especially when it's a woman.
- Q. Why is a woman in a particularly more weak position than any other junior student in the MHTE division?
- A. Music theory is, unlike musicology and ethnomusicology, still very much man dominated, both by faculty and by the student body. So up to not too long ago, and 2016 was certainly in that period, Yiyi was just among maybe two women among maybe a handful or -- among maybe 20 students, there were maybe two or three women.
- So, they were clearly in a weakened position compared to both the student body and the faculty body. One of the motivations why I tried to hire more women in order to balance the situation on the advisory level towards our women students and to attract more women students.
- Q. Is it sexist to ask that women students fulfill their obligations in tasks or in TA-ships and RA-ships?

I can't see a connection between the statement
     Α.
and this -- between the contents of the statement and
the tasks that committee was asked for doing, which,
again, I'm completely outside and really didn't follow
up with what that committee was doing.
          I can assure you that some of the functions of
the committee are equally mysterious to us, professor.
              Can I have the copy of the student petition
           I have what I think will be the last exhibit,
vou have?
and I think we're coming in right on time, sir. The one
that's signed. Do I have it here?
                            No, here we go.
               MS. HARRIS:
                                             I got it.
               MR. ALLEN:
                           I have one.
                                        Okay.
                                               For the
last exhibit for Professor Heidlberger's examination, I
would like to mark this as Exhibit 34.
              (DEPOSITION EXHIBIT 34 MARKED.)
          (By Mr. Allen)
                          Now, I just want to -- oh, I'm
     Q.
sorry.
        Professor Heidlberger, have you had a chance to
examine this document?
          Yes.
     Α.
          Have you had a chance to examine this document?
     Q.
          Yes.
     Α.
          I am going to ask if you had ever received this
     Q.
document before?
          No.
     Α.
```

```
Were you aware of this document?
1
        Q.
              No.
2
        Α.
              Given that you did not receive this document,
3
        Q.
   I'm just going to direct your attention to the page at
4
   the bottom, Kohanski 109, and you'll see there, again,
5
   1, 2 and 3.
                 Do you see those 1, 2, 3 paragraphs?
6
7
              Yes.
        Α.
             And that's under a subheading, "Calling for Dr.
8
        Q.
   Jackson's Dismissal," correct?
9
              Correct.
10
        Α.
              Have you now or before ever called for Dr.
11
        Ο.
   Jackson's dismissal?
12
              No.
13
        Α.
              I want to direct your attention to No. 3, where
14
        Ο.
   it says, "extortion through grade manipulation and
15
   threats to students' careers and reputations." Do you
16
   see that?
17
18
        Α.
             Yes.
19
              And I'm going to characterize the document to
        Q.
   you that the undersigned individuals at the end of this
20
   letter are accusing Dr. Jackson of extortion through
21
   grade manipulation and threats to students' careers and
22
   reputations. And my question for you, Professor
23
   Heidlberger, do you have any knowledge that Timothy
24
```

Jackson has extorted students through grade manipulation

and threats to careers and reputations?
          No, not to this extent.
     Α.
          What do you mean, to this extent?
     Q.
          There have been repeatedly complaints by
students about Dr. Jackson's approaches in his classes
that came to my attention as chair of the division, but
they were never specific enough to take action, other
than making sure that a particular student is -- is --
to make sure that a student is taken out of the
influence of Dr. Jackson and put in another class or put
in another function as a grader or TA or something like
that.
       That has happened. There was a pattern of that,
yes.
          Would you characterize that as a mismatch of
     0.
expectations?
          Probably, yes.
     Α.
          Would you characterize it as racist?
     Q.
          No.
     Α.
          Would you characterize it as sexist?

          I cannot answer that.

          Could you state why you can't answer that?

to as "these statements", do you mean the statements of
the students who came to you when you were department
chair?

my colleague and Professor Jackson.
                                      I think we've
concluded the deposition, but I want to just --
               MR. BOHUSLAV:
                              Sure.
                                     We'll give you the

               MR. ALLEN:
                           It will be up to you, if you
want to pass the witness and cross examine.
               (OFF THE RECORD FROM 11:56 TO 12:05 P.M.)
          (By Mr. Allen) Professor Heidlberger, I have
     Q.
only one more question.
                         It appears in Volume 24 in 2017
of your Journal Theoria, you publish an article titled
"Was Heisst Geschichte der Musiktheoria, Dahlhaus's
Essay and Its Methodological Impact," is that correct?
          Correct.
     Α.
          And may I loosely translate that as what is
     0.
known as the history of music theory?
          Yes.
     Α.

Q.

- I'm not trying to be eloquent in my Q. translation, but that's a more or less accurate --It's very good, but I quote the German one Α. because it starts already a problem to translate that. And I'm not so much interested in the content Ο. of the article, but this was a publication you placed in your own journal, correct? As part of such a panel, as the later Russian Α. theory panel appeared, yes. Was there any objection or concern raised at the time that this represented a conflict of interest because you were also the editor of the journal? No. Α. Has there been any conflict of interest raised Ο. since then? Absolutely not. Α. Has the journal ever been investigated because Q. this potentially created a conflict of interest? No. Α. MR. ALLEN: I have no further questions. I pass the witness. **EXAMINATION** BY MR. BOHUSLAV:
- real quick, just to make sure I have the right number.

I have one question. Let me pick up an exhibit

```
Professor Heidlberger, I've shown you Exhibit 32.
1
                  Do you have your own copy?
2
                   MR. ALLEN:
                               I do, but if you would
3
   characterize the exhibit to the Court, I think it would
4
   help us.
5
              (By Mr. Bohuslay) Okay.
                                         I'm showing you
6
        Q.
7
   what's been marked as Exhibit 32. I'll represent to
   you, it's the faculty statement in July of 2020.
   that a fair characterization?
10
              Yes.
        Α.
             Okay. When you signed this document, in July
11
        0.
12
   of 2020, did you agree with all the statements it
   contains?
13
              Yes.
14
        Α.
              And to this day, do you continue to agree with
15
        Q.
   all the statements in that document?
16
17
              Yes.
        Α.
18
                   MR. BOHUSLAV:
                                  Okay. I'll pass the
19
   witness.
                   MR. ALLEN: No further questions. We can
20
   close the deposition.
